

**General Physics 1–Honors (PHYS 101H):  
Problem Set 0**

Chris Monahan  
*Department of Physics, William & Mary*

**Overview**

This Problem Set will allow me to get to know you a bit better! And give you practise in submitting your Problem Set correctly via Blackboard.

This Problem Set is worth 10 points, but all future Problem Sets will be worth 50 points each. There are five questions in this Problem Set.

**Instructions**

Read these instructions carefully. You must submit your Problem Set as a **single PDF** file (it is best to use an app like Adobe Scan to make your solutions legible), with the file name `lastname_hwXX.pdf` (replace `lastname` with your last name and `XX` with the problem set number).

You are responsible for ensuring your solutions are legible. You will lose points if they are illegible, unclear, or a mess.

**Question 1** **2pts**

Tell me about any previous experience you have with physics courses. What topics did they cover? You do not need to discuss any grades you have received.

**Question 2** **2pts**

What is your intended or declared major? What has drawn you to that intended major?

**Question 3** **2pts**

What are you most looking forward to about this course?

**Question 4** **2pts**

How can I help you make the most of this course?

**Question 5** **2pts**

What are you most looking forward to as a student at William & Mary? If this is not your first year at William & Mary, what do you most enjoy about the university?
